

About Us

Duson® was established with a clear goal to provide our customers with the best quality and affordable prices. Over these years, we successfully developed our unique style, became partners with international leaders of the field, and occupied our niche in the Armenian and Georgian market.

- We value the comfort and health of our customers. That is why we use state-of-the-art technologies in manufacturing orthopedic mattresses and bedding accessories. The high-quality modern equipment of the Duson® factory makes it one-of-a-kind for the entire region. We combine the best traditions of manufacturing with up-to-date technologies and use natural components in our products.

Duson® never stops developing and improving. The list of our business partners includes legendary American Leggett & Platt® corporation. This company specializes in making raw materials for mattress production and has been the well-known leader of the field for over 125 years.

Duson® already operates 6 brand shops in Armenia and 5 more in Georgia. However, the process of international development of the Armenian brand is not limited to this: Duson® continues to conquer new export markets and present the Armenian product of the highest quality to other countries.

Manufacturing Mattresses in Armenia

In 2016, the Duson® mattresses manufacturing factory was put into operation. Duson® mattresses are produced using both local environmentally friendly materials and high-quality imported components. Moreover, Duson® is the only manufacturer in the region to have an exclusive contract on material and equipment supply with the leading American company Leggett & Platt®.

New models are constantly being developed and introduced to meet growing market requirements. Most of the mattresses are designed for home use. Duson® also offers collections for hotels and hospitals, series for children, pregnant women, and more.

Duson® mattresses meet the requirements of the International Standards Organization (ISO 9001:2008) and the International Association of Sleep (ISPA). They are distinguished by the high quality, unique style, wide range of products, and, of course, affordable and consumer-friendly prices.

Please note:

Duson® manufactures over 50 models of orthopedic mattresses and bedding accessories (mattress toppers, pillows, blankets etc.)

Box mattresses presented below are Duson®'s new line of production, which are more convenient for export.

Mattress sizes and design details can be customized upon request.
